Title:

COMPOUNDS AND METHODS FOR THE TREATMENT AND

PREVENTION OF BACTERIAL INFECTION

Assistant Commissioner for Patents

Washington, D.C. 20231

## PRELIMINARY AMENDMENT

Prior to examination, kindly amend the above-referenced application as follows.

## In the Specification:

Please replace the paragraph on page 17, lines 8-15, of the specification with the following paragraph that has been re-written in clean form.

Fig. 15 is an alignment of the amino acid sequence of PA (SEO ID No.: 24) with other binary A-B toxins that have ADP ribosyltransferase activity. The amino acid sequences of toxins from Clostridium difficile ("cdADPRT"; SEQ ID No.: 25), C. perfringens ("cpiota"; SEQ ID No.: 26), C. spiroforme ("csiota"; SEQ ID No.: 27), and C. botulinum ("cbc2"; SEQ ID No.: 28) are listed. The C. perfringens and C. spiroforme toxins are frequently referred to as iota toxins while the botulinum toxin is referred to as C2. Additionally, the alignment includes the sequence of the toxin produced by Bacillus cereus ("VIP1"; SEQ ID No.: 29), which is frequently referred to as VIP for vegetative insecticidal protein.

Please replace the paragraph on page 17, lines 16-19, of the specification with the following paragraph that has been re-written in clean form.
